- North Las Vegas

- NOTES:
1. Trail corridors (permanent) are to be located outside of public street right-of-ways and are typically located adjacent to street corridors. 5 feet of the public street right-of-way may be used as a part of the total width as required above, if public sidewalk is not to be built at the back of curb.
2. Use of unimproved right-of-way areas as temporary trail corridors is acceptable until the unimproved right-of-way is utilized for another purpose.
3. Trail corridors are public-use, multi-modal facilities including non-equestrian and equestrian users (unless otherwise noted in the legend above). Non-equestrian users are non-motorized and include: bikers, walkers, joggers, skaters, and physically challenged persons.

GIS maps are normally produced only to meet the needs of the City. Due to continuous development activity this map is for reference only. Geographic Information System Planning & Development Dept. 702-229-6301
